ABOUT US

Faithful to the design, *masterful* in the making.

UNIMOB works with architects, interior designers, contractors and project teams. It takes a holistic approach to every project it receives, from technical detailing and shop drawings to production, and from quality control to installation and handover.

Alongside project-based production, UNIMOB manufactures furniture and collections for Turkish and international brands, and aims to be a reliable production and solutions partner in Türkiye and in international markets.

> *We preserve the originality of the design and draw on our knowledge of materials and our production experience to develop solutions that are aesthetic, functional and buildable.*

PRODUCTION FACILITY	SPECIALISTS	SECTORS	BRAND REFERENCES

OUR PROCESS

What we *do*.

We work with architects, interior designers and project teams, and manage every project as a single team from the first line to handover.

01

Project Analysis & Planning

We review the design and requirements shared by architects, interior designers and project teams, and plan the materials, production method and schedule together.

02

Technical Drawings & Shop Drawings

We make the project buildable. We finalise dimensions, joints, materials and installation details, and secure sign-off before production begins.

03

Materials & Detailing

We select wood, veneer, lacquer, metal, glass and fabric to suit each project, and develop details that keep the design language intact.

04

Bespoke Production

We manufacture fixed and loose furniture in our own facility to the approved drawings.

05

Quality Control & Shipping

We check every piece against the project and the technical drawings, and organise shipping to site.

06

Installation

We complete installation in line with the architectural project and site conditions.

07

Handover

After the final checks, we hand the project over complete.

PRODUCTION FACILITY

5,000 m²

In our own facility, by our own craftspeople.

In our 5,000 m² facility, an advanced machine park handles CNC machining, cutting, edge banding, lacquer, polish and UV finishing under one roof. Alongside wood and veneer, we resolve metal, glass, upholstery, lighting and stone details for each project.

01	CNC machining
02	Cutting and edge banding
03	Lacquer, polish and UV finishing
04	Solid wood and veneer
05	Metal, glass, upholstery, lighting and stone details
